About

I am driven by a love for continuous exploration and learning, creating captivating user experiences, solving problems, and writing clean and efficient code.

Work

Frontend Engineer at Uzum Technologies

August 2017 – August 2018

- Developing internal applications.
- Participating in sprint planning and code reviews.
- Migrated the project from Webpack 4 and Node 14 to Webpack 5 and Node 18, speeding up deployments.
- Integrated and configured Tailwind CSS, speeding up the development of new features.
- Integrated and configured Flagsmith, simplifying feature flags management.

Frontend Engineer at BirdsBuild

August 2017 – August 2018

- Played a key role in building a B2B marketplace.
- Lead the development of an admin app for the marketplace, optimizing internal processes.
- Lead the migration from JavaScript to TypeScript.
- Lead the migration from Vue 3 to Nuxt 3, improving application performance and SEO.
- Lead the development of a landing page using Nuxt 3, contributing to user acquisition.
- Actively contributed to the project's architecture and structure, ensuring it was well-organized, effective, and scalable.
- Contributed to UI Kit development, improving design consistency and frontend efficiency.
- Researched and incorporated Storybook for UI Kit, facilitating component testing and documentation.

Skills

- JavaScript & TypeScript
